

DIGADES

Driven by electronics, the Germany-based radio applications specialist develops and manufactures electronic components and systems in the automotive, motorcycle and IoT sectors.

“The 3DEXPERIENCE platform helps us to shorten development cycles while delivering high-quality products.”

— Dr.-Ing. Sascha Berger, CEO, digades

Challenge

To support the growth of their product portfolio without compromising the quality, digades needed to simplify the collaboration between engineering and manufacturing teams.

Solution

The company adopted the 3DEXPERIENCE[®] platform to expedite their processes by providing a unified and consistent product definition to diverse engineering, as well as sourcing and shop floor teams.

Benefits

The unified architecture and data-driven approach helps digades to keep projects on track and to minimize costs of late manufacturing changes. The platform facilitates the standardization of products and processes to accelerate the time-to-market for compliant products.
